Drag and drop the correct answer

1. _____ is how quickly a population changes in size.
2. If the death rate is greater than the birthrate, the population is likely to _____ size.
3. Death rate and emigration can _____ the population size.

decrease Population Growth decrease in

LIVEWORKSHEETS

Drag and drop the correct answer

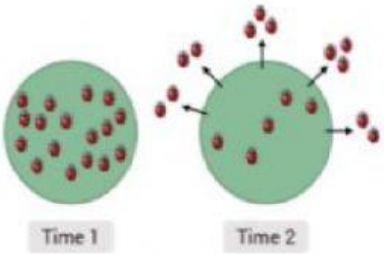
Populations exhibit _____ when resources are unlimited, resulting in a(n) _____ curve. When resources are limited, populations exhibit _____ resulting in a(n) _____ curve.

S-shaped | logistic growth | exponential growth | J-shaped | L-shaped | density growth

LIVEWORKSHEETS

Assume a population of beetles has an equal birthrate and death rate.

Drag and drop the correct answer



The beetle population shows a _____ pattern of distribution. In this beetle, population _____ is greater than _____. Over time, the beetle population _____ in size.

increases | emigration | immigration | clumped | random | decreases

LIVEWORKSHEETS

Drag and drop to complete the table		
Type of Growth model		
Resources	Are limited	
Shape of Curve		

Exponential **logistic** **are unlimited**

S-shaped **J-shaped**
