FINAL MIDTEM TEST 1 - GRADE 11 - FORM 2025

Read the following advertisement and mark the letter A, B, C or D on your answer sheet to indicate the option that best fits each of the numbered blanks from 1 to 6.

A Vision for Tomorrow

- In the cities of the future, **(1)**_____ will reshape how we live, work, and interact with the world around us. These sustainable urban areas will be eco-friendly and designed to meet the needs of a growing global population while protecting the environment. With innovative public spaces and smart infrastructure. They will provide the highest quality of life **(2)**_____ citizens.
- Imagine living in a connected smart home, powered by renewable energy and **(3)**_____ with technologies that allow you to control everything from lighting to temperature with a simple voice command. Transportation systems will be seamless, featuring autonomous vehicles and electric trains that reduce pollution, **(4)**_____ efficiency, and enhance the overall travel experience.
- The future of urban living is about more than just technology; it's about creating harmonious spaces where people and nature can coexist **(5)**_____. With green energy solutions and clean public transport, cities will not only thrive but will also lead the way in sustainability.
- These future cities will be built to maximize energy efficiency and reduce waste, offering a healthier, greener environment for everyone. We are on the **(6)**_____ of a new era in urban living, where sustainable green buildings line the streets and transportation networks run on clean energy, making cities more livable and eco-friendly than ever before.

Question 1:A. smart innovation solutions **B.** innovation smart solutions
C. solutions innovation smart **D.** smart solutions innovation

Question 2:A. with	**B.** to	**C.** for	**D.** about
Question 3:A. was equipped	**B.** equipped	**C.** which equipped	**D.** equipping
Question 4:A. improve	**B.** to improving	**C.** to improve	**D.** improving
Question 5:A. peaceful	**B.** peace	**C.** peacefulness	**D.** peacefully
Question 6:A. verge	**B.** tip	**C.** border	**D.** edge

Read of the following leaflet and mark the letter A, B, C or D on your answer sheet to indicate the option that best fits each of the numbered blanks from 7 to 12.

A Dynamic Partnership

- ASEAN (Association of Southeast Asian Nations) plays a significant role in the development of the region, and Vietnam is one of its most influential members. The cooperation between Vietnam and other ASEAN countries is pivotal for economic, political, and social growth in Southeast Asia.
- Vietnam shares many similarities with **(7)**_____ ASEAN countries, especially in terms of culture and economic development. Vietnam has been working hard to **(8)**_____ positive changes in its economic policies, in line with ASEAN's goals for regional integration.

LIVEWORKSHEETS

- The **(9)**_____ between ASEAN countries, including Vietnam, has led to significant regional stability. Vietnam has actively participated in ASEAN's development initiatives **(10)**_____ facing numerous challenges.
- Vietnam has made considerable progress in terms of **(11)**_____ in agriculture, which aligns with ASEAN's long-term goals. There are **(12)**_____ opportunities for economic growth in ASEAN countries, and Vietnam stands to benefit from these prospects.

Question 7:A. the others	**B.** other	**C.** others	**D.** another
Question 8:A. come apart	**B.** faff about	**C.** bring about	**D.** get about
Question 9:A. cooperation	**B.** competition	**C.** conflict	**D.** contrast
Question 10:A. in front of	**B.** in spite of	**C.** in terms of	**D.** in place of
Question 11:A. productivity	**B.** innovation	**C.** sustainability	**D.** efficiency
Question 12:A. few	**B.** several	**C.** many	**D.** none

Mark the letter A, B, C or D on your answer sheet to indicate the best arrangement of utterances or sentences to make a meaningful exchange or text in each of the following questions from 13 to 17.

Question 13:

a. John: Oh, that's a great topic! I believe there are a few key things that can really help. First of all, eating a balanced diet is essential. Lots of fruits, vegetables, and whole grains.

b. Anna: I agree! I've also heard that regular exercise is important. But sometimes I'm just too tired after work. How do you manage to stay active?

c. Anna: Hi John, I've been thinking a lot about how to live a long and healthy life lately. Do you have any tips?

A. a-c-b **B.** a-b-c **C.** c-a-b **D.** b-a-c

Question 14:

a. Tom: That's true. It's hard to explain that to them because they didn't have smartphones or social media when they were our age. They also seem to think that online friendships aren't as real as face-to-face ones.

b. Emma: Hey Tom, do you ever feel like there's a generation gap between us? I sometimes feel like older people just don't understand the way we think.

c. Tom: I totally get what you mean, Emma. It's like they grew up in a completely different world. The way we communicate, the technology we use, everything is so different.

d. Emma: Yeah, and when I tell them I prefer watching shows on streaming platforms instead of watching TV, they act like it's a waste. They think traditional TV is still the best way to enjoy entertainment.

e. Emma: Exactly! For example, my parents still don't understand why I spend so much time on my phone. They think I'm wasting my time, but for me, it's how I stay connected with friends and keep up with the world.

A. c-a-e-d-b **B.** c-d-e-b-a **C.** b-c-e-a-d **D.** a-b-e-c-d

Question 15:

Dear Lucas,

LIVEWORKSHEETS

a. Vietnam's growing economy and its efforts in promoting peace and stability in Southeast Asia have made it an important player in the region.

b. However, there are still challenges, such as economic disparities among ASEAN countries, but I believe with continued cooperation, these can be addressed.

c. I'm also proud of how Vietnam aligns with ASEAN's goals for sustainability, especially in renewable energy and environmental protection.

d. I hope you're doing well! I've been thinking about Vietnam's role in ASEAN recently. As a member of ASEAN, Vietnam has benefited a lot, especially in trade through agreements like AFTA.

e. What are your thoughts on Vietnam's future within ASEAN?

Looking forward to your reply!

Best,

LK

A. d-a-c-b-e **B.** b-e-d-c-a **C.** a-b-c-d-e **D.** c-b-d-a-e

Question 16:

a. Although economic disparities still exist between ASEAN members, Vietnam's rapid development, especially in technology and infrastructure, offers hope for bridging these gaps.

b. With its growing influence, Vietnam continues to be a key player in shaping the future of ASEAN, driving positive change for the entire region.

c. Over the years, Vietnam has not only contributed to regional economic integration but also actively participated in maintaining peace and security, particularly in sensitive issues like the South China Sea.

d. Vietnam has played a vital role in ASEAN's growth and development, benefiting from regional trade agreements like AFTA and increasing its economic ties with neighboring countries.

e. The country's commitment to sustainability, focusing on renewable energy and environmental protection, aligns perfectly with ASEAN's long-term goals for a greener and more resilient future.

A. d-c-e-a-b **B.** a-e-d-c-b **C.** e-c-d-a-b **D.** c-a-d-e-b

Question 17:

a. Every small action, from using less plastic to adopting clean energy, makes a difference.

b. Global warming is no longer a future threat but a present-day reality. From melting glaciers to extreme weather events, its impact is undeniable.

c. The fight is not just for governments or corporations; it's a global challenge that we all must face together.

d. Tackling global warming requires more than reducing emissions — it's about changing how we live, consume, and interact with our environment.

e. However, rather than succumbing to fear, we should see this as an opportunity to change. Innovations in renewable energy and sustainable practices are already paving the way for a greener future.

A. b-e-d-a-c **B.** b-c-a-e-d **C.** b-e-d-c-a **D.** b-a-d-e-c

LIVEWORKSHEETS

Read the following passage about Global Warming: Causes, Consequences, and Solutions and mark the letter A, B, C or D on your answer sheet to indicate the option that best fits each of the numbered blanks from 18 to 22.

Global warming **(18)**_____. Rising global temperatures are affecting ecosystems, weather patterns, and human health in ways that are impossible to ignore. Countries **(19)**_____, contributing to an increasingly unstable climate. For instance, rising sea levels threaten coastal cities and natural habitats. It is not just governments that need to take action; **(20)**_____ and conserving resources. Given the global nature of the problem, international cooperation is essential in tackling climate change. Scientists, **(21)**_____, continue to push for stronger environmental policies. Although progress is being made, much more needs to be done. The growing awareness of the crisis is leading to some positive changes, but without swift and bold action, the impacts will only worsen. **(22)**_____, with every nation, community, and individual taking responsibility for the planet's future.

Question 18:

A. has become one of the greatest challenges of our time

B. that has become one of the greatest challenges of our time

C. has becoming one of the greatest challenges of our time

D. which has become one of the greatest challenges of our time

Question 19:

A. that fail to act swiftly are exacerbating the crisis

B. that failed to act swiftly are exacerbating the crisis

C. that are failing to act swiftly are exacerbating the crisis

D. who fail to act swiftly are exacerbating the crisis

Question 20:

A. every individual has a role to play in reducing emissions

B. every individual has a role to play, reducing emissions

C. every individual, has a role to play in reducing emissions

D. every individual, playing a role in reducing emissions

Question 21:

A. raising alarms about the consequences of climate change for decades

B. raised alarms about the consequences of climate change for decades

C. having raised alarms about the consequences of climate change for decades

D. having raising alarms about the consequences of climate change for decades

Question 22:

A. The fight against global warming, requires a global effort

B. The fight against global warming requires, a global effort

C. The fight against global warming requires a global effort

D. The fight against global warming requiring a global effort

LIVEWORKSHEETS

Read the following passage about Cities of the Future and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.

The cities of the future will be dramatically different from the ones we live in today. With technology advancing rapidly, urban areas will become smarter, greener, and more efficient. Renewable energy sources, such as solar and wind, will power most buildings and transportation systems, reducing the **reliance** on fossil fuels. Cities will be designed with sustainability in mind, featuring eco-friendly architecture and extensive green spaces.

In the future, transportation will be revolutionized. Autonomous electric vehicles will replace traditional cars, and public transport will be powered by clean energy. **Cities will also embrace advanced technologies, such as drone delivery systems and smart infrastructure, to improve efficiency. These innovations will make cities more livable, reducing traffic congestion and pollution.**

However, future cities will not be without challenges. Issues like data privacy, cybersecurity, and social inequality could arise as cities become more interconnected. **It** will be essential for governments and businesses to address these concerns while developing smart cities. Nevertheless, the benefits of advanced technologies will likely outweigh these challenges.

Ultimately, the cities of the future will focus on creating sustainable, efficient, and livable spaces for people. The **combination** of technology, eco-friendly design, and smart infrastructure will pave the way for a better urban future.

Question 23: Which of the following is NOT mentioned as a feature of future cities?

A. Flying cars for personal transportation

B. Autonomous electric vehicles

C. Public transport powered by clean energy

D. Smart infrastructure and drone delivery systems

Question 24: The word "**reliance**" in paragraph 1 is OPPOSITE in meaning to _____.

A. Dependence **B.** Independence **C.** Support **D.** Necessity

Question 25: Which of the following best paraphrases the underlined sentence in paragraph 2?

A. Cities will adopt basic technologies, like drones and smart infrastructure, to make life easier for residents and reduce transportation costs.

B. Advanced technologies such as drones and smart systems will have little impact on the livability of cities or the environment.

C. The adoption of modern technologies like drones and smart systems will help cities become more efficient, making them less crowded and cleaner.

D. The use of drones and smart systems in cities will only focus on improving entertainment options and business growth.

Question 26: The word "**It**" in paragraph 3 refers to _____.

A. The existence of challenges in future cities

B. The interconnectedness of cities

LIVEWORKSHEETS

C. The advancement of technology

D. The development of smart cities

Question 27: The word "**combination**" in paragraph 4 could be best replaced by _____.

A. Mixture **B.** Collection **C.** Separation **D.** Exclusion

Question 28: Which of the following is TRUE according to the passage?

A. Future cities will focus on reducing technological advancements to limit challenges.

B. The benefits of advanced technologies are expected to be smaller than the challenges they present.

C. Public transportation in future cities will be powered by renewable energy sources.

D. Future cities will rely entirely on fossil fuels for their energy needs.

Question 29: In which paragraph does the writer mention transportation in the future?

A. Paragraph 4 **B.** Paragraph 2 **C.** Paragraph 1 **D.** Paragraph 3

Question 30: In which paragraph does the writer mention a key feature of future buildings?

A. Paragraph 1 **B.** Paragraph 4 **C.** Paragraph 3 **D.** Paragraph 2

Read the following passage about the Global Warming: A Looming Crisis and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 31 to 40.

Global warming is a pressing issue that is affecting **every nook and cranny** of the globe. The rise in Earth's average temperature is primarily driven by human activities, particularly the burning of fossil fuels, which releases large amounts of carbon dioxide into the atmosphere. These gases trap heat, creating a "greenhouse effect" that is warming the planet. As temperatures rise, the effects on weather patterns and ecosystems become more extreme and noticeable.

One of the most alarming consequences of global warming is the increase in extreme weather events.**[I]** Hurricanes, wildfires, and heatwaves are becoming more frequent and **intense**. **[II]**Rising temperatures are also contributing to the melting of polar ice caps, which leads to rising sea levels. **[III]**Coastal cities, such as Miami and New York, face the real threat of flooding, while vulnerable ecosystems, like coral reefs, are dying off at an alarming rate. In addition, **[IV]**, with crops failing due to unpredictable rainfall and extreme droughts.

Despite these challenges, there is hope. A shift toward renewable energy sources like solar, wind, and hydroelectric power is one way to reduce greenhouse gas emissions. Governments around the world are adopting policies aimed at reducing carbon footprints and limiting emissions from industrial sectors. **Many countries are also investing in energy-efficient technologies and seeking to transition away from fossil fuels in favor of greener, sustainable alternatives.** However, much more needs to be done to slow down the warming process before the situation becomes irreversible.

The fight against global warming requires a collective effort from all countries, industries, and individuals. While large-scale policies and innovations are necessary, individual actions also play a critical role in mitigating the crisis. People can reduce **their** carbon footprint by using public transportation, conserving energy at home, and reducing waste. If every person contributes, the global community can help slow down the effects of global warming, ensuring that future generations inherit a planet that is livable and sustainable.

LIVEWORKSHEETS

Question 31: The phrase "**every nook and cranny**" in paragraph 1 could be best replaced by_____.

A. Break down **B.** Run into **C.** Pick up **D.** Spread across

Question 32: The word "**intense**" in paragraph 2 is OPPOSITE in meaning to _____.

A. Severe **B.** Extreme **C.** Strong **D.** Mild

Question 33: Where in paragraph 2 does the following sentence best fit?

changing weather patterns are causing agricultural losses

A. [I] **B. [II]** **C. [III]** **D. [IV]**

Question 34: Which of the following is NOT mentioned as a consequence of global warming in the passage?

A. Melting of polar ice caps

B. Reduction in renewable energy sources

C. Rising sea levels

D. Increased frequency of extreme weather events

Question 35: Which of the following best summarises paragraph 2?

A. The consequences of global warming include rising temperatures, more extreme weather events, and the threat to coastal cities and ecosystems like coral reefs.

B. Global warming leads to severe weather changes, including rising temperatures, melting ice, and rising sea levels, which pose risks to cities and ecosystems.

C. Rising global temperatures are affecting ecosystems and coastal cities, with increasing extreme weather events and rising sea levels being major concerns.

D. Global warming causes a rise in extreme weather events, melting ice caps, and coastal flooding, all of which affect the environment and ecosystems.

Question 36: Which of the following is TRUE according to the passage?

A. The effects of global warming are limited to rising temperatures and do not affect ecosystems.

B. Global warming is caused primarily by human activities, especially the burning of fossil fuels.

C. A collective effort from governments, industries, and individuals is essential to combat global warming.

D. Renewable energy sources are not considered as effective solutions for reducing greenhouse gas emissions.

Question 37: Which of the following best paraphrases the underlined sentence in paragraph 3?

A. Many countries are investing in technologies that promote energy efficiency and are shifting to cleaner energy sources.

B. Several nations are funding energy-saving technologies while continuing to use fossil fuels in their industries.

C. Numerous governments are focusing on reducing carbon emissions by adopting more sustainable energy alternatives.

D. Various countries are making efforts to improve energy use and reduce dependence on traditional energy sources.

Question 38: The word "**their**" in paragraph 4 refers to _____.

LIVEWORKSHEETS

A. The people

B. The collective effort

C. The individual actions

D. The large-scale policies

Question 39: Which of the following can be inferred from the passage?

A. The global fight against climate change requires both systemic changes and individual efforts.

B. Governments alone are responsible for reversing the effects of global warming through policies.

C. Individuals must take action to fight global warming, but large-scale technological advancements are not enough.

D. Solutions to global warming depend only on adopting renewable energy sources and avoiding fossil fuels.

Question 40: Which of the following best summarises the passage?

A. Global warming is a serious issue driven by human actions, causing extreme weather, rising sea levels, and ecosystem collapse. Renewable energy and individual actions are essential to mitigate this crisis.

B. The primary cause of global warming is human activities, which are causing more frequent natural disasters and the melting of polar ice. Governments and individuals must act together to slow down climate change.

C. Human-induced global warming has led to rising temperatures, severe weather, and threats to ecosystems. Solutions like renewable energy, policy changes, and personal actions are necessary for a sustainable future.

D. Global warming is an urgent problem driven by fossil fuel use, causing extreme weather and ecosystem destruction. Transitioning to renewable energy and taking individual actions can help address the issue effectively.
