Ordering Numbers

When we order numbers from the smallest number to the largest number (least to greatest), we say the numbers are in **ascending** order.

e.g. 13 46 78 89

Numbers written in **descending** order are ordered from largest to smallest (greatest to least).

e.g. 92 65 51 29 6

Order each group of numbers in ascending order (from least to greatest).

26 **16** **61** **62**

55 **25** **15** **53**

Order each group of numbers in descending order (from greatest to least).

12 ***21*** ***32*** ***23***

81 **15** **37** **89**

Choose the larger number in each pair of numbers:

8	80	6	12
18	38	42	24
11	3	16	2
