Name: _____

Subject: Mathematics

Topic **Quarter (¼)** of a set

When we make **quarter** of a set, we share the set into **four** equal parts.

Each part gets the same number.

Example:

Ted has **12** balls.

He shared the **12** balls equally among **himself**, **Sam, Ned** and **Tim**.

He made 4 **equal groups.**

Each boy gets **a quarter (¼).**

¼ of **12** = **3**

Ted

Sam

Ned

Tim
