C.	How many Sumatran Elephants are there?	Not very many. They are endangered.
D.	How much water do you have?	A lot! It can weigh up to 80 kilograms.

II. **Read. Choose** *True* or *false*

Galápagos Penguins

Did you know that Galápagos penguins live off the coast of Ecuador? These small animals are amazing. They live on islands in the ocean. They are up to 50 centimeters tall and weigh only about 2.5 kilograms. However, there are fewer than 2,000 Galápagos penguins in the world.

There are several reasons why they are endangered. Sometimes the environment is not clean. Sometimes the weather changes and there's a lot of rain. Then there aren't good places for the parents to take care of their babies.

Fortunately, some young people study how to protect them. With a combination of some fantastic conservation projects and people's help, scientists are continuing to try to help these penguins live in the wild.

A.Galápagos penguins live in a reserve.	☐ *TRUE*	☐ *FALSE*
B. A lot of rain is good for the penguins.	☐ *TRUE*	☐ *FALSE*
C. Some people want to improve the area where the penguins live.	☐ *TRUE*	☐ *FALSE*

III. **Circle the correct word.**

1. Rabbits move **quick** / **quickly**.
2. Kangaroos **easy** / **easily** carry their young in their pouch.
