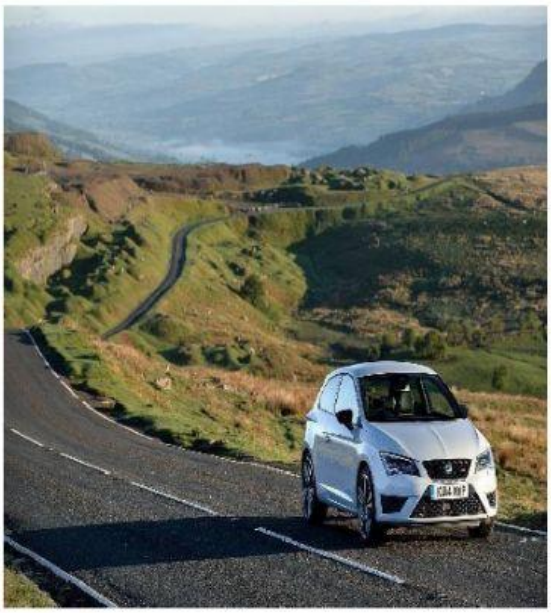
Calculating Speed

Directions: Complete the table with the missing information. Remember, speed = distance/time. Youwill calculate speed, distance, and time.

Find out the speed of a car traveling in m/s.
Speed = distance/time

A. 100 meters in10 seconds	
B. 300 meters in10 seconds	
C. 700 meters in35 seconds	
D. 1000 meters in 200 seconds	



Think: Car A travels 100 metersin 5 seconds. If car B travels the same distance in 2 seconds, which one is travelling at the faster speed?Car A or Car B?
