Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions from 31 to 36.

Cybercriminals are becoming more skilled at tricking people into sharing personal information, especially through fake emails and websites. With the help of AI, these scams (often blackmail) are more convincing and harder to detect. Gmail accounts are particularly targeted because they are linked to other Google services, storing large amounts of personal data. Once a hacker gains access, they can send out emails, saved passwords, files, and even financial information.

Phishing scams – where attackers trick individuals into **revealing** personal details – are now easier to create, even for those with minimal technical skills. AI tools allow scammers to generate fake emails and websites

LIVEWORKSHEETS

that look real, making it harder for people to spot fraudulent attempts. As a result, more individuals are unknowingly falling victim.

To protect yourself, be cautious when dealing with emails from unknown senders. Don't click on links in **suspicious** messages; instead, manually type the website's address into your browser. Use a password manager to help you access only legal sites. Regularly monitor your accounts and enable two-factor authentication for added security. Never share sensitive information via email, even if it appears to come from a trusted source. If you receive a suspicious email, check your Google Account directly for security concerns. Stay alert!

31. What is the main idea of the passage?

A. Gmail accounts, the easiest to be hacked by cybercriminals

B. Phishing scams and precautions to protect personal information

C. AI technology only used by experts to create phishing scams.

D. Gmail accounts – the only accounts at risk of being hacked

32. Why are Gmail accounts targeted by hackers?

A. They are easy to hack. B. They are linked to other Google services with a lot of personal data.

C. They are not protected by passwords. D. They are rarely used for important purposes.

33. Which of the following is NOT a recommended way to protect yourself from phishing scams?

A. Avoid clicking on links in suspicious emails.

B. Use a password manager for secure logins.

C. Share personal information via email if the sender seems trustworthy.

D. Enable two-factor authentication for extra security.

34. What should you do if you receive a suspicious email?

A. Click on the link to verify its authenticity. B. Delete the email without taking any action.
