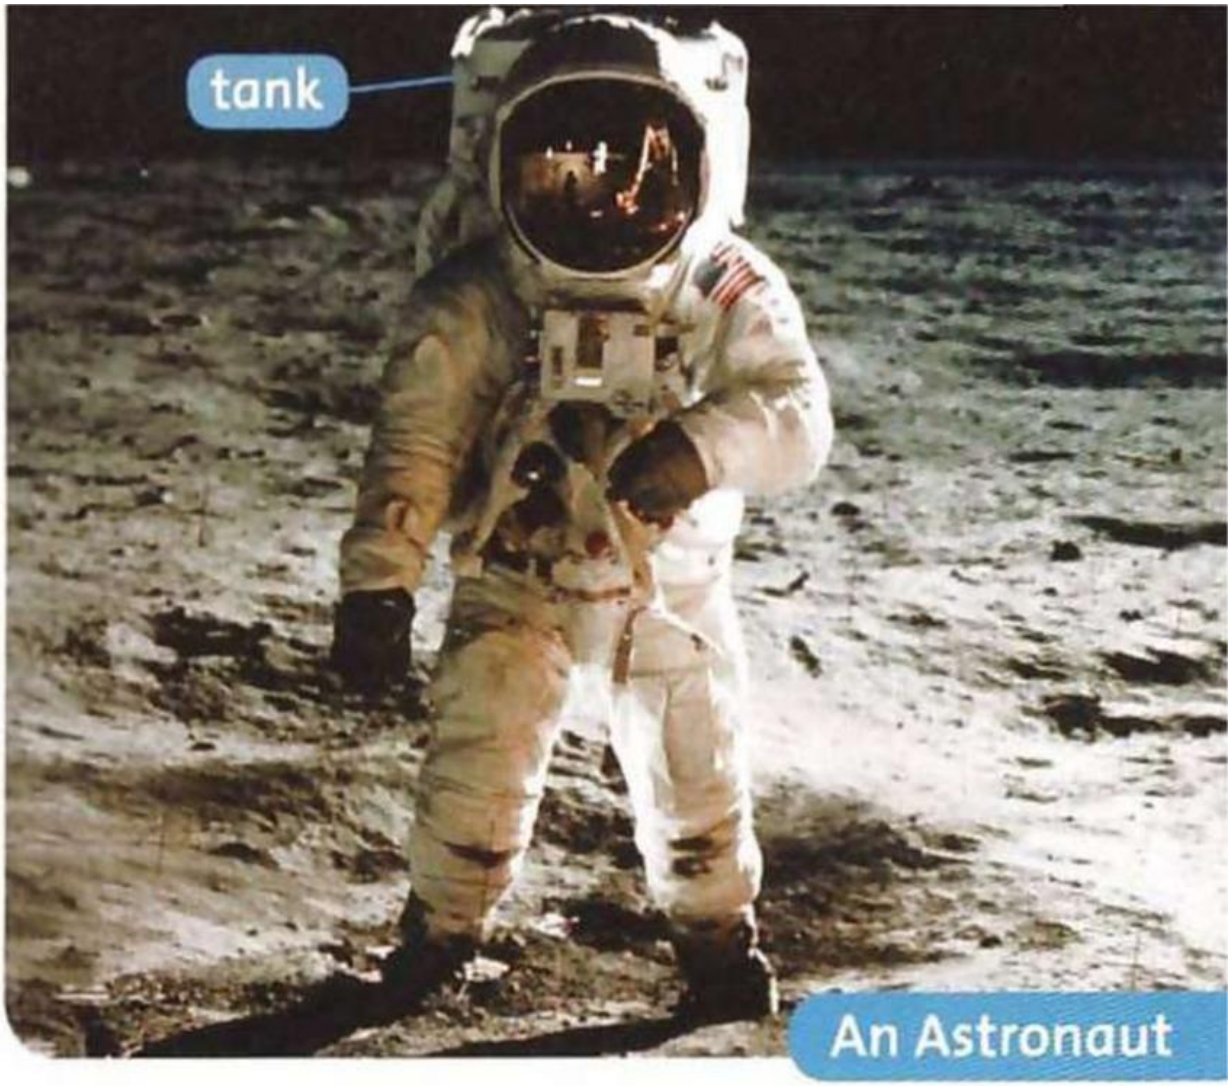
7 On the Moon

On the moon there's dust and rock. There are tall mountains, and big holes called craters. There's black space all around, and no blue sky. There's no weather because there's no sky. It's hot in the day and it's cold at night.

LIVEWORKSHEETS



An Astronaut

Astronauts can go to the moon. This astronaut is on the moon. How amazing! He has a space suit and he breathes air from a tank.

Footprints are on the moon for a million years! There's no wind to blow them away.
