A Day at the Community Library

Every Saturday morning, Lucia visits the community library near her home. The library is small, but it is one of her favorite places because it is quiet and full of interesting books. Lucia usually spends two hours reading stories or researching topics for school.

Last weekend, she participated in a special reading club organized by the librarian, Mr. Jacobs. The club included activities such as reading short stories, discussing their themes, and sharing opinions with other students. Lucia enjoyed listening to different points of view, especially from her new friend, Mateo, who loves science fiction.

Before going home, Lucia borrowed two books: one about space exploration and another about mystery stories. She felt excited because she planned to read them during the week. For Lucia, visiting the library is not only educational but also relaxing and fun.

1. **Multiple-Choice Questions**
