Planning the Future

Lucas has many things happening in his life, so he has started thinking seriously about his future. First, he is going to study engineering at university because he has always been interested in technology. He has already checked the programs, and he knows exactly which courses he wants to take. Next year, he is going to move to a different city, since the university is far from his hometown.

Lucas also has some predictions about his future. He thinks university life will be challenging at first, but he is sure he will make new friends quickly. He believes he will learn important skills that will help him in his career. Even though he feels a little nervous, Lucas knows that everything will work out if he works hard.

1. Why is Lucas going to study engineering?
