Nama :

Kls/No : Hari,tgl :

Simaklah video berikut ini dengan seksama!

contoh :

$$\frac{1}{5} + \frac{2}{4} = \frac{(20:5)\times 1 + (20:4)\times 2}{20} = \frac{4\times 1 + 5\times 2}{20} = \frac{4+10}{20} = \frac{14}{20} = \frac{7}{10}$$

KPK 5 dan 4 = 20

Tentukan hasil penjumlahan pecahan dibawah ini sampai paling sederhana !

1 $\frac{1}{5} + \frac{1}{4} = \frac{(\square:\square)\times\square + (\square:\square)\times\square}{\square} = \frac{\square\times\square + \square\times\square}{\square} = \frac{\square+\square}{\square} = \frac{\square}{\square}$

KPK 5 dan 4 = ☐

2 $\frac{2}{3} + \frac{1}{5} = \frac{(\square:\square)\times\square + (\square:\square)\times\square}{\square} \quad \frac{\square\times\square + \square\times\square}{\square} = \frac{\square+\square}{\square} = \frac{\square}{\square}$

KPK 3 dan 5 = ☐

3 $\frac{2}{7} + \frac{1}{4} = \frac{(\square:\square)\times\square + (\square:\square)\times\square}{\square} = \frac{\square\times\square + \square\times\square}{\square} = \frac{\square+\square}{\square} = \frac{\square}{\square}$

KPK 7 dan 4 = ☐

4 $\frac{1}{6} + \frac{3}{4} = \frac{(\square:\square)\times\square + (\square:\square)\times\square}{\square} = \frac{\square\times\square + \square\times\square}{\square} = \frac{\square+\square}{\square} \quad \frac{\square}{\square}$

KPK 6 dan 4 = ☐

5 $\frac{4}{9} + \frac{1}{3} = \frac{(\square:\square)\times\square + (\square:\square)\times\square}{\square} = \frac{\square\times\square + \square\times\square}{\square} = \frac{\square+\square}{\square} = \frac{\square}{\square}$

KPK 9 dan 3 = ☐

LIVEWORKSHEETS

contoh :

$$\frac{1}{3} + \frac{1}{4} = \frac{4}{12} + \frac{3}{12} = \frac{7}{12}$$

Kerjakan soal dibawah ini sesuai dengan contoh diatas ! !

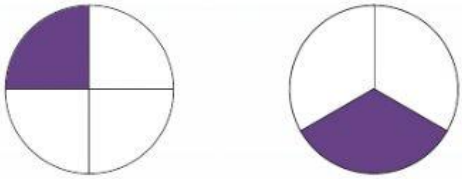
1

$$\frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

2

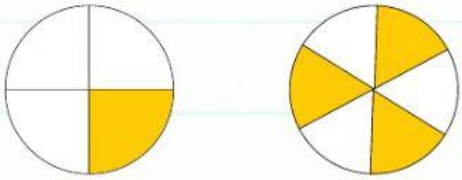
$$\frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

3



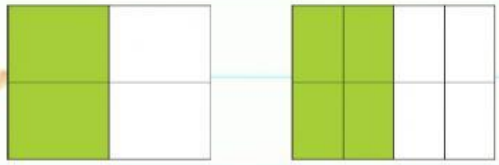
$$\frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

4



$$\frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} = \frac{\square}{\square}$$

5



$$\frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} = \square$$
