Module E – Vocabulary List A1

Practice Page 1

I. Read the paragraph and answer the questions below:

Doctors are paying attention to details of new health problems. They have come to the conclusion that the central cause of illness is the food that people eat. Of course, getting enough sleep and physical activity are beneficial too. They are confident that people who make a decision to make every meal contain healthy food will feel much better.

1. What is the main reason people get sick?
   a. new health problems
   b. physical activity
   c. unhealthy food
2. What are doctors sure about?

_____

_____

Today doctors face new diseases. Scientists have been having difficulties finding new antibiotics. They do experiments on many new things. They are trying to develop drugs that are effective against the new diseases. However, it seems that even if they do discover stronger antibiotics they will be very expensive.

1. What is hard for the experts?
   a. to discover new medicines
   b. to find new diseases
   c. to do experiments
2. What other problem are we facing with the new drugs?

_____
