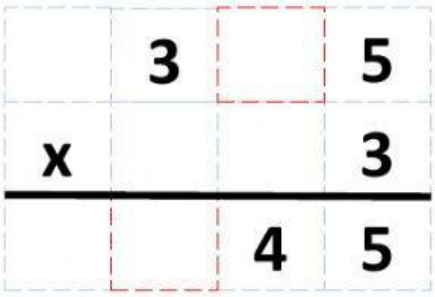
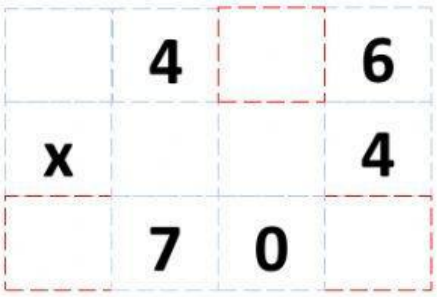
Multiplication and Division Practice

Multiplication

23 x 2 =		21 x 31 =	
47 x 3 =		43 x 22 =	
63 x 5 =		67 x 13 =	
87 x 4 =		34 x 50 =	
342 x 3 =		18 x 18 =	
482 x 4 =		24^2 =	

Fill in the squares with the missing number:





A t-shirt costs $45. How much would you pay for 7 t-shirts?

$

Tom went to the fair every day for a week. It cost $19 to get in.

How much did it cost him for the whole week? $

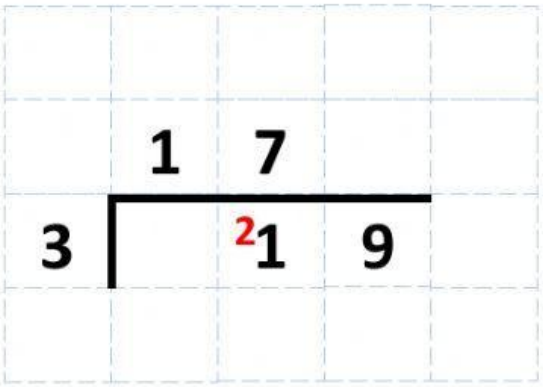
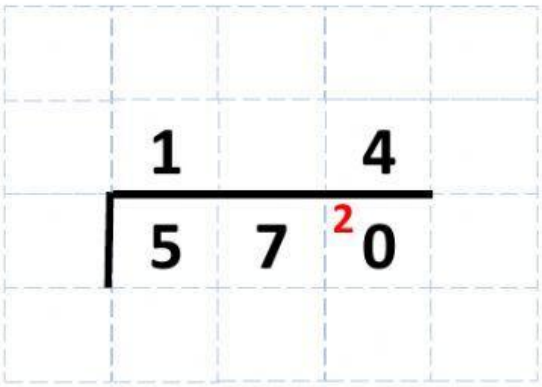
Division

21 ÷ 3 =		208 ÷ 4 =	
28 ÷ 4 =		320 ÷ 5 =	
17 ÷ 5 =		824 ÷ 4 =	
23 ÷ 4 =		622 ÷ 3 =	
419 ÷ 3 =		798 ÷ 5 =	
706 ÷ 5 =		312 ÷ 3 =	

Fill in the missing numbers to complete the short division question.





John has 728 marbles, and he wants to give them to his 4 friends. If each friend gets the same amount of marbles, how many marbles will they get?

Sarah has 37 cookies to share with her 7 friends. If she shares them out equally, how many cookies will Sarah have left over for herself at the end?

Tina has 64 lollipops to give to her 6 friends. She wants to give them an equal amount each.
How many lollipops will they each get?

How many lollipops will be left over for Tina?
