I recently watched The Office, a famous T.V. show. with 9 seasons and 201 episodes.

I had just finished Abbott Elementary and I enjoy my own company watching comedy T.V. shows, so I was looking for a new one. Finally, I decided to give the opportunity to an old one I hadn't seen before: "The Office". At first, I wasn't so sure about it because I get easily bored and, to be sincere, I am not a risk-taker when it comes to the way I spend my free time, but I had heard some people saying it was great.

Michael Scott is the main character in it. He works in a paper company and he is the boss of the Scranton branch. He is such a wierd man, but yet, so common. I think you can find your own Michael Scott wherever you work. And actually, I think that is the reason why I like this show so much. All of the characters represent someone you know in your own context, and even some of the weird situations you might live it by your own at some point of your life.

Michael gives the impression of he doesn't deserve being the boss because, again, he is such a weird person. He has an outgoing personality and a special sense of humor. He thinks of himself he is a good company but yet, he feels lonely because he does not have any friends. He considers people from the office like his own family, but his co-workers avoid them almost all the time.

As you keep watching the show, you will realize that Michael, who is usually considered a bad company, is not a bad person at all. Sometimes, he just speaks his mind making people feel uncomfortable.

I could keep going talking about this T.V. show because it is really funny, but in case you have not seen it yet, I will not spam. So, give The Office the opportunity to surprise you and learn about their characters while watching it.
