How to use the thermometer correctly

(a) Place a **beaker** filled with **water** on a **flat** surface.

(b) Immerse the thermometer into the water in an **upright** position. Ensure that the **bulb** of the thermometer does not touch the **bottom** surface of the beaker.

(c) Wait until the thermometer liquid remains **constant**. Adjust the position of the **eye** to the **meniscus** of the thermometer to obtain the **temperature** reading.
