CHAPTER 3 REVIEW

Lesson 3.1 & 3.2

Adding and Subtracting Unlike Fractions

$\frac{1}{2} + \frac{3}{7} = \frac{\quad}{\quad} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$

$\frac{7}{8} - \frac{1}{2} = \frac{\quad}{\quad} - \frac{\quad}{\quad} = \frac{\quad}{\quad}$

LCD

$\frac{3}{4} + \frac{5}{6} = \frac{\quad}{\quad} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$

4:

6:

$\frac{5}{6} - \frac{5}{12} = \frac{\quad}{\quad} - \frac{\quad}{\quad} = \frac{\quad}{\quad}$

$\frac{2}{3} - \frac{2}{5} = \frac{\quad}{\quad} - \frac{\quad}{\quad} = \frac{\quad}{\quad}$

LCD

$\frac{5}{6} - \frac{5}{8} = \frac{\quad}{\quad} + \frac{\quad}{\quad} = \frac{\quad}{\quad}$

6:

8:

LIVEWORKSHEETS

Lesson 3.3 & 3.4

Turning improper fractions into mixed numbers and mixed numbers into improper fractions.

LIVEWORKSHEETS

Lesson 3.5

Turning fractions into decimals.

$\frac{7}{10} =$

$\frac{3}{10} =$

$\frac{78}{100} =$

$\frac{61}{100} =$

$\frac{3}{5} = \frac{\times}{\times} = \frac{}{} =$

$\frac{17}{20} = \frac{\times}{\times} = \frac{}{} =$

$\frac{23}{25} = \frac{\times}{\times} = \frac{}{} =$

$\frac{1}{4} = \frac{\times}{\times} = \frac{}{} =$
