6,500 16,500 60,500

animals and plants are endangered

What is an endangered species?

LIVEWORKSHEETS

It's an animal that has disappeared.	It's an animal that lives in captivity.	It's an animal that is at risk of extinction.

The risk of becoming extinct o the risk of extinction means that there is a risk that the animal will

appear / disappear / vanish

and that there will be no longer any members of that species

alive / live / life

What are the causes of extinction ?

- It's part of evolution
- It's because of human activity
- It's because of God's will
- It's because of the Moon activity

Humans made the rate of extinction 1,000 to 10,000 times

faster

slower

than what would occur naturally

What is conservation ?

- it's booking a ticket e.g. to the zoo
- It's the protection of species against becoming endangered
- it's the preservation of biodiversity

LIVEWORKSHEETS
