Multiples

* Multiples are numbers that result when we _____ one whole number by another whole number.
* Example: Find the <u>first four multiples</u> of 5

$$5 \times 1 = 5$$
$$5 \times 2 = 10$$
$$5 \times 3 = 15$$
$$5 \times 4 = 20$$

- The first four multiples of 5 are 5, 10, 15, and 30.
- Some other multiples of 5 are 20, 30, 300 because

$$5 \times 4 = 20$$
$$5 \times 6 = 30$$
$$5 \times 60 = 300$$

- We can <u>NEVER</u> find ALL of the multiples of 5 (or any number).
