Before 18-year-old Margareth Thompson started her first day as a member of the Royal Air Force in September 1944, she had finished her high school studies in July that year. Her mother authorized her to join the armed forces because she knew that a huge number of service men had already died in action and all kind of help was urgent. Margareth was appointed to type condolence letters to families who prayed to see their young boys back home one day. Only then, she could realize first hand that only few aircraft returned home safe and sound after every mission. Definitely, it was disappointing to count the number of casualties. However, more young men and women enlisted, and Margareth as well as the whole country had a hope; they longed to win that absurd war started by an insane nazi leader. Margareth had to wait until her next birthday in 1945 to get peace and to begin to rebuild their country.
