A) Solve the following addition problems.

1)	82 + ( ) = 140	2)	97 + ( ) = 131	3)	45 + ( ) = 112
4)	69 + ( ) = 112	5)	86 + ( ) = 125	6)	( ) + 88 = 111
7)	( ) + 14 = 112	8)	( ) + 96 = 115	9)	( ) + 64 = 140
10)	( ) + 69 = 154	(a) + ( ) = − (b) ( ) + = − Example: (a) 20 + (5) = 25 Solution: 25 − 20 = 5 (b) (5) + 20 = 25 Solution: 25 − 20 = 5
