What do these phrasal verbs mean?

The Earth is heating up. The average temperature is much higher than it was 100 years ago.

to heat up – _____

Fossil fuels give off greenhouse gases like carbon dioxide. This causes global warming.

to give off – _____

People have cut down over 50% of the world's forests in the last 60 years.

to cut down – _____

A lot of plants and animal special will die out because of the climate change.

to die out - _____

Read what two students think about climate change. Who is more worried about the situation?

Emma

We are using up fossil fuels like coal and gas very fast. If we carry on like this for much longer, we will have no fuel left and it will be impossible to stop climate change. We must change the way we live and start looking after the environment. Politicians must wake up and take action! We can't put it off!

Tom

It's impossible to come up with a solution that everyone is happy with. We can't just close down all the coal and gas power stations. We rely on fossil fuels for most of our energy. And it's difficult to persuade people to change the way they live. How many people will give up their cars? Not many! We should just learn to live with climate change, not try to stop it.

_____ is more worried.

Find nine phrasal verbs in the texts above *(phrasal verb = verb + preposition)*

_____ _____

_____ _____

_____ _____

_____ _____

_____

Match five verbs from the list above with the definitions below

1. Continue = _____
