Fractions - Word Questions Ex. 6c

1) Mark ate 7/12 of a bar of chocolate. What fraction was left?

Solution:
Whole = 12/12
Fraction eaten = 7/12
∴ Fraction left = 12/12 - 7/12 = **5/12**

2) I spilt 3/5 of a pitcher of milk. What fraction remained?

Fraction remaining = ____ - ____ = _____

3) 7/11 of the pupils in my class are absent. What fraction is present?

Fraction Present = ____ - ____= ____

4)Tim spent 5/6 of his money and saved the rest. What fraction did he save?

Fraction saved = ____ - ____ = ____

5) I have read 2/7 of my book. How much more do I need to read to finish the book?

Fraction to read = ____ - ____ = ____
