Name

The crisis of covid in India is much more of not only take precautions but much more

Let's look first at the video clips before answering the questions

https://youtu.be/Aqn_CYJLH3Y

The claim is that because of India's population group and the fact that they didn't take the measurements given to them to protect them against the virus it put India in a bad situation that can holds severe impact on the Global scale.

LIVEWORKSHEETS

With countries stepping in late to assist India in their needs is the question there is it too late or can they turn this over before the season pass.

Border of India and Bangladesh

LIVEWORKSHEETS

After watching the videos carefully you are going to answer the questions in your own way of understanding the situation.

1. Why did the spread of the virus happen so fast?

2. Why wasn't the country not prepared for the situation

LIVEWORKSHEETS

3. Why are they now reliable on other countries to give those vaccinations even though India is the world biggest pharmaceuticals Company and supplier in the world.

4. Why is there now vaccines for his own country

LIVEWORKSHEETS

5. What make the control of the virus so difficult in you think of the order of the boarders to five your hypothesis regarding the issue of transmitting and spreading the disease and the impact this would have on the Global economic and world population if the virus would jump country for this matter?

LIVEWORKSHEETS

6. What would you think would happen if the dubble mutation virus would enter Africa as a continent, the economic side and human population?
