1. Read and answer:

Saba is an Eskimo. He lives in an igloo, a house made of ice, in the North Pole. He likes playing with a little polar bear. His name is Snowball. Every day he gets up at half past eight and he puts on warm clothes because it is very cold in the North Pole. Saba's mum always makes hot chocolate for breakfast and after breakfast Saba goes to school. His classes start at quarter past ten. He can see Snowball from the classroom window. Snowball always waits outside the school. When it is quarter to three, Saba goes home! Before going home, he goes to Mr. Scalion's shop to see what he can buy. There are a lot of things: sweets, apples, muesli, toffees, fishburgers. Snowball wants some sweets.
