Name: _____ Class Period: _____

Mixed Computation Review—Add, Subtract, Multiply, and Divide
"Liveworksheets" Work Page

Solve the problems. Be sure to pay attention to the operation. Some quick reminders:

- **Add/Subtract—Line up decimals. Add or subtract. Bring the decimal straight down.**
- **Multiply—Don't line up decimals. Multiply pretending there are no decimals. Count the number of decimals places in the problem, put the same number of places in the answer.**
- **Divide--Do you need to move the decimal on the outside? If so, move it inside the same number of spaces. Decimal straight up. Divide lining up digits carefully.**

1) $77.2 - 43.778 =$ _____	**2)** $2.072 \div 0.4 =$ _____
3) $68.1 * 0.09 =$ _____	**4)** $27.001 - 7.5 =$ _____
5) $4.23 * 9 =$ _____	**6)** $19.2 + 31.82 =$ _____
