# QUIZ #2 - SCIENCE 3

## A. Identify the following:

_____ 1.) Are the hairs at the edge of our eyelids. They stop sweat, dust, and dirt from entering our eyes.

_____ 2.) Are covers that open and close.

_____ 3.) Thick, short hairs above our eyes. They protect eyes from dirt and sweat.

_____ 4.) Bulging, transparent covering of the sclera.

_____ 5.) Is the tough, outer covering that forms the "whites" of our eyes.

_____ 6.) Colored circle in our eyes. It may be black, brown, gray, green or blue.

_____ 7.) Dark spot at the center of the iris.

_____ 8.) Clear part of our eyes behind the pupil.

_____ 9.) Is the part of your eye behind the retina. It sends message to a big nerve and travels to our brain then our brain understands those messages.

_____ 10.) Is the lining at the back of your eyeball where images are formed.

Iris Pupil Lens Sclera

Retina Eyelids Eyelashes Cornea

Optic Nerve Eyebrows
