Asmaa Bint AlNou'maan Secondary Schoold

Grade 9 Advance

Activity 1.3.3

Categorise the following statements as True or False:

Statement	True / False
A procedure is a small section of code within a program that performs a task.	
Procedures are used to reduce the repetition of code and to calculate value.	
'make' is the keyword to create a procedure.	
Execution is the term given to running a procedure.	
Indented code tells Python that the code belongs to the procedure.
