The Eagle Has Landed!

The American flag is placed on the moon

American astronaut Neil Armstrong has become the first person to step on the surface of the moon.

Armstrong used the phrase 'the eagle has landed' to let Houston know that the lunar module had actually landed on the moon.

As Armstrong put his foot on the moon he declared: "That's one small step for man, one giant leap for mankind." The craft landed on an area of the moon called 'the sea of tranquility'.

By George Smith

Armstrong was joined on the moon by Edwin 'Buzz' Aldrin. A third astronaut, called Michael Collins, stayed aboard the Columbia mothership and orbited the moon.

The two moon bound astronauts stayed on the moon for a total of around 21 hours. They spent most of this time inside the lunar module.
