# Narrative Writing

**When you write about what happens in class, you remember details better and gain a deeper understanding of the subject.**

**Writing Prompt: Use the blank page below to write a <u>narrative story</u> about a time when you had to find the percent of an amount. Remember to include an introduction that includes the setting, character (you), problem. Then, a body that states the step you took to solve the problem (changing the percent to a decimal and then multiplying it by the amount). Finally, a conclusion that shows how you felt afterward.**

| Narrative Writing Rubrics | Points |
|---|---|
| **Introduction** ( Setting, Characters, Problem) | **30** |
| Body (Show steps taken to solve the problem) | **50** |
| **Conclusion** (What you learned and how you felt afterward) | **20** |
| Total | |
