Read the text, then fill the following table.

The Starry Night is one of Van Gogh's masterpieces. Currently, the painting is stored in the Museum of Modern Art, New York. The 73.7 x 92.1 cm painting is Because of its strong colors.

The strokes and color choices in this painting are very strong. The night sky is drawn with curved lines. Some people feel that the blue color, as it dominates the whole canvas, means to hold back the anger. Combined with yellow, which means insecure.

In my opinion, this painting describes the deep feelings of the painter. I feel like I can enter the world of Van Gogh. I also made the painting "The Starry Night" as my desktop wallpaper and seeing it made me happy.

Currently, Van Gogh's painting "The Starry Night" has been widely adapted into stickers, digital printing and other media. If you can't see this painting in person, you can have it in other forms of media.
