Unit 5
Review

REVIEW THE BIG Q

What is Earth made of?

Lesson 1

What are some kinds of land and water?

1 Look and match the words with their descriptions.

mountain	A large body of slow moving ice containing fresh water.
plain	A raised part of Earth's surface that is high and large.
lake	A large flat area of land that is ideal for farming.
glacier	An area of fresh water that is smaller than the ocean but bigger than a pond.

2 Circle one way glaciers and rivers are similar.

a) They move slowly. b) They can flow into the ocean.

c) They have fresh water.

Lesson 2

How can people help protect Earth?

3 Look and mark (✓) the items that you can recycle in the bin shown.
