1. We can see an example of the good effects of music in Donal, a teenager who started having seizures at a young age. Treatments didn't seem to help, but music did. What did he do with the help of his therapist?

2. What do music therapists do, apart from making the patients listen to songs?
3. Why do these therapists include the patients' family in their treatment?
4. What type of music does Donal like?
5. Mention 3 things that Donal could do with the lyrics/ song he wrote
  - 1.
  - 2.
  - 3.
6. Does he want to show his song?
7. What beneficial effects does music have?
8. What three areas are positively affected when music stimulates the brain?
  - 1.
  - 2.
  - 3.
