STEVE JOBS

Steve Jobs was a computer programmer, inventor and businessman. Jobs was born on 24th February, 1955 in the US. When he was young, his father taught him how to repair electronics like radios and TVs. This helped Jobs choose his future career. He went to university, but left after six months. When Jobs was 21 years old, he and his friend Steve Wozniak started Apple Computers. They worked in Jobs' garage. Their user-friendly personal computers were very successful and they sold thousands of them. At the age of 25, Jobs was a multimillionaire. He didn't actually invent the iPod, iPhone and iPad, but he helped change the world of computers, music and communication forever. When he died on 5th October, 2011, at the age of 56, people said, "The world is a better place because of him."

Getting Ready to Write

Content

In a biography, we usually include personal information about the person (place of birth, date of birth, date of death) and details about his / her education, jobs and achievements.
