Identify the *generic structure and the social function* of the descriptive text below.

Tidung Island

Tidung Island is divided into two islands, which are Pulau Tidung Besar and Pulau Tidung Kecil. Tidung Islang is only about 200 meter wide and 5 kilometer long. It is home to about 4,000 inhabitants. Tidung offers secluded beaches, starry nights and an amiable community.

Tidung Island is located relatively close to the capital city of Jakarta. You would not have to spend unnecessary time just trying to get there. It is about 3-hours ride away from Muara Angke, using wooden boat or ferry. Alternatively, you can catch a speed boat from Ancol Marina Harbor that would be just 1.5-hours away.

The slim width of the land gives Tidung Island an unique shape. You can enjoy the beautiful stretches of sandy, white beaches and clear blue waters. Tidung waters are quite shallow, and almost overgrown with coral reefs which are in excellent condition. You can dive underwater and enjoy the coral reefs that are teeming with a colorful collection of tropical fish and exotic sea creatures.
