GLOBAL SUCCESS 11 Unit 3

Cities of the future

WRITING

Làm bài bên dưới và tìm thêm 1 ý cho phần Advantages và 1 ý cho phần Disadvantages (*ý thôi, ai có thể thì viết cả câu không thì ghi chú bằng vài cụm từ là được*). Ghi vào tập chuẩn bị.

1 Read the following ideas and decide whether they are advantages or disadvantages of living in a smart city. Tick (✓) the appropriate box.

	Advantages	Disadvantages
1. Smart technologies make people's lives easier by reducing household chores.		
2. Without training, people will not know how to use the technologies in the smart city.		
3. People have limited privacy due to the cameras installed everywhere in the city.		
4. The negative impact on the environment is less.		
5. Smart technologies help the city operate more efficiently.		
6. People become worried because their personal information might not be protected.		

Chép bài báo bên dưới vào tập chuẩn bị. Gạch dưới bằng viết đỏ các từ, cụm từ và cấu trúc các em quan tâm (mỗi đoạn ít nhất 2).

LIVING IN A SMART CITY: GOOD OR BAD?

1

2 If you live in a smart city, you will probably agree with me that life is not all good as some people may think. So what are the pros and cons of living in a smart city?

3 The good thing about smart cities is that they are very modern. Smart technologies make people's lives easier by reducing household chores. Besides, the city infrastructure which includes sensors and cameras collects information about people and their activities, and uses it to provide faster, cheaper, and better services.

4 On the other hand, living in a smart city has some disadvantages. Some smart technologies are difficult to use and without training, city dwellers might find them useless. With cameras everywhere in public spaces, people also have limited privacy. They are worried that their personal information might not be protected, and they might become victims of cybercrime.

5 In conclusion, living in a smart city has both advantages and disadvantages. However, I think these urban areas offer great promise. The issues should be dealt with in the years ahead as the world's population keeps growing, and more people are moving to big cities.
