Live Worksheet 2

# Medical Assistance

Following your study with the flipped book, Worksheet 2 will guide you through situations where medical assistance is needed on board. You'll cover important topics like body parts, medical procedures, and how to effectively communicate when requesting medical help. This worksheet helps you apply your knowledge of maritime communication and medical protocols in real-life situations.

## A Read the words. Draw the arrows to match the body parts with the types of protective clothing.

| | |
|---|---|
| 1.Feet | safety gloves |
| 2.Eyes | ear defender |
| 3.Head | safety goggles |
| 4.Hands | safety boots |
| 5.Ears | hard hat |

LIVEWORKSHEETS

## G Read the injury text and choose the correct verbs below to fill in the blank:

caused | avoided | passed | fractured | maintained

**A broken leg sustained during a berthing operation (IMO FSI14, No14)**

**What happened?**

A ship was in the process of berthing in a relatively strong wind and tide. The master on the bridge was using the main engine, rudder and bow thrusters to hold the vessel alongside while the mooring lines were (1) _____ ashore by the forward and after mooring parties.

The forecastle party, led by the boatswain, had run a line from each of the port and starboard mooring winches before being made fast ashore. Tension came on the forward mooring lines suddenly which (2) _____ one line to part and (3) _____ the boatswain's right leg in two places.

**Why did it happen?**

1. The mooring rope which parted was in a poor condition.
2. The maintenance of the ship's mooring lines was inadequate.
3. The boatswain was standing in an unsafe position in the "snap-back" zone of the mooring line.

**What can we learn?**

Mooring operations carry risks due to the loads placed on lines and equipment. Mooring lines must be regularly inspected and carefully (4) _____
