**b** boa constrictor

**a** harpy eagle

**c** pygmy glider

**d** toucan

1 This animal lives in the canopy of the rainforest. It's mainly a fruit-eater, although it sometimes likes to catch a lizard or snake from the forest floor. It's got a big yellow and brown sharp bill (similar to a beak) that it uses to pick and throw fruit. _

2 This little animal lives in the giant trees and the canopy of the rainforest. It eats insects and fruit as well as pollen. It is about the size of a mouse. It has a brown, black and white tummy and a very long, thin, feathery tail. _

3 This long animal lives in the understory of the rainforest. It is a great hunter and likes to surprise its prey. It eats birds, frogs, lizards and rodents. It is very strong and it has circular and oval-shaped brown patterns on its body. _

4 This animal lives in the emergent trees of the rainforest. It has a pale, grey head, black outer feathers and white under feathers. It likes to eat monkeys and sloths. _

**Read the sentences and circle true (T) or false (F).**
