Mercury is the smallest member of the sun's family which is only 3,100 miles across. It is also the sun's **swiftest** planet. Its yearly journey round the sun is only 85 days.

Mercury always keeps one side towards the sun. On this side it is always day, on the other side it is always night. We only see the lighted side.

Mercury appears to us like a yellowish orange star. The nearest planet to the sun, it is

LIVEWORKSHEETS

always seen near the sun, either just before sunrise or soon after sunset. People sometimes call Mercury the morning star or evening star.

Mercury is half the size of the earth. Because it is much lighter, it has much less gravity. If you can visit Mercury in a spaceship, you will find it a strange world. Its low gravity makes you feel very light. If your weight on earth is 100 pounds, your weight on Mercury is only 27 pounds. Looking at the sun from Mercury, you can see that it's much more brilliant than **it** is seen from the earth. And the yellow centre of the sun appears three times bigger from Mercury. On the lighted side, Mercury's temperature is about 300 degrees centigrade. But the dark side is extremely cold, 150 degrees below zero so Mercury is probably the coldest as well as the hottest of the planets.

1. What is the passage mainly about?

A. Members in Solar system **B.** Mercury **C.** Gravity **D.**Solar system

2. We cannot see the dark side of Mercury because _____.

A. it moves very fast

B. it always appears just before sunrise or soon after sunset

C. it always keeps one side towards the sun

D. it is too far for us to see

3. The word "**it**' in paragraph 4 refers to _____.

A. Mercury **B.** the sun **C.** gravity **D.** the earth

4. The word **swiftest** in paragraph 1 is closest in meaning to _____.

A. fastest **B.** coldest **C.** hottest **D.** biggest

In 2005, Cliff Jones began a journey round Britain on a unicycle, a bike with only one wheel. He had already made a documentary film about his experiences travelling round Europe in a 50-year-old car. He was mad about motor sport and had a job building racing car engines. To save money, Cliff rode to work in London on an old bicycle, which he also used to go to France on holiday. 'That trip opened my eyes,' he says. 'I decided to do a tour of Britain by bike.'

Cliff didn't want a normal touring bike, and he knew he wanted to build one himself. After one false start in 2004, when he had to turn back because of a knee injury, he finally set out in 2005. He was away for four months, and travelled over 8,500 km.

The best bit of the trip was arriving in Wales and seeing Mount Snowdon. 'Although I met cyclists who could easily ride up mountains on their bikes, which I couldn't do, I never regretted my unicycle.'

His worst moment came when he had to drink some dirty water from a stream. A serious fever kept him in bed in hospital for five long days. He was determined not to give up and go back home before he had completed his challenge, but found it hard to
