Science Exam

A. Choose the right answer

1. a material that electric charges can easily flow through.

conductor repel

2. the movement of particles with electric charge between objects that are not touching.

Neutral Static discharge

3. to act or react to something.

Interact source

4. to push or pull of charged objects on each other.

Electric force attract

5. a material that slows the Flow of electric charges.

Insulator force

B. Write the missing word or words in the space, help yourself with the box (one word is an impostor)

Natural magnet	Electromagnet
Permanent magnet	source
Electric charge	neutral

LIVEWORKSHEETS

1. _____ An object that is magnetic without human influence.

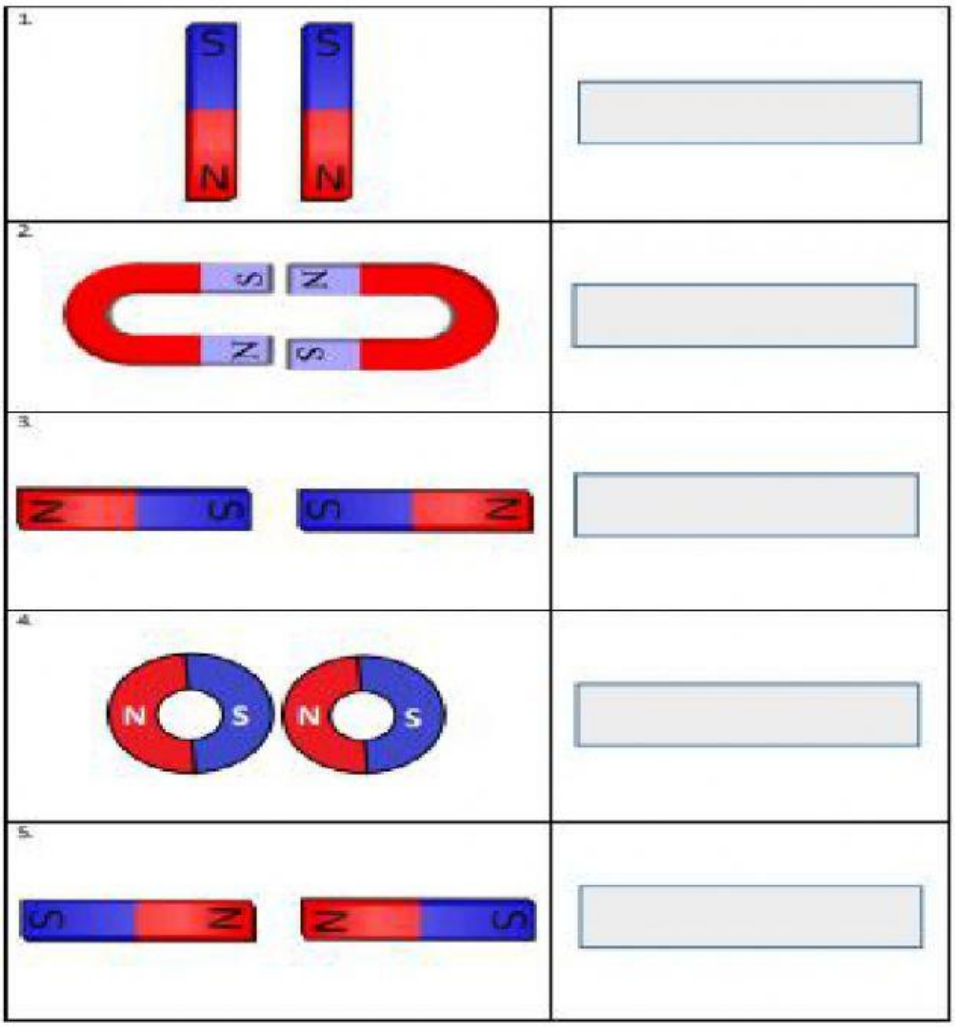
2. _____ Something that is always magnetic.

3. _____ a magnet that can be turned on and off with an electric current.

4. _____ the point on a magnet where magnetic force is stronger.

5. _____a negative or positive charge.

Write whether the following magnets will **ATTRACT** or **REPEL** each other.



LIVEWORKSHEETS
