
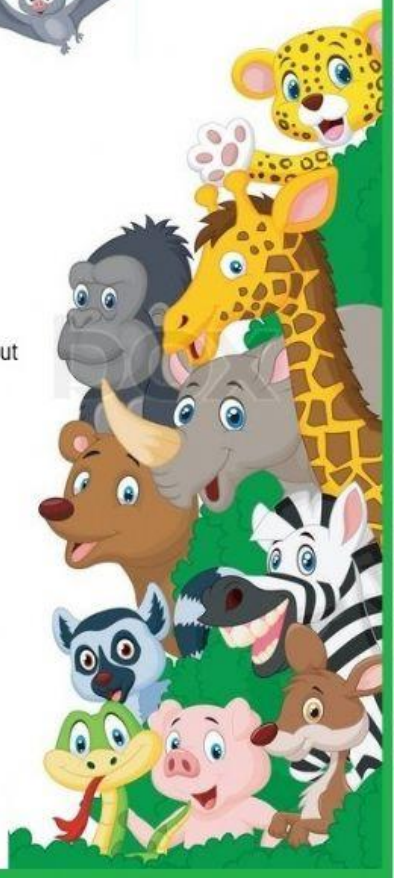
WILD ANIMALS

Wild animals live on their own. They don't need help from people.

They live in their natural habitats. In their habitats, wild animals find four important things: food, shelter, air and water.

There are lots of different habitats for different _ _ _ _ _ _:


- ✓ In the savannah there are zebras, giraffes, elephants and _ _ _ _ _ _. But there aren't many trees.
- ✓ In the ice, there are seals, penguins and _ _ _ _ _ _ _ _ _ _ _. You can see white ice and snow everywhere, but there aren't any plants.
- ✓ Snakes, lizards and _ _ _ _ _ _ live in the desert. This place is always very hot and dry. It never rains in the desert.
- ✓ Whales, _ _ _ _ _ _ _ and octopuses live in the sea. They are aquatic animals. They all eat small fish and seals, too.
- ✓ We can find birds in many different habitats. The jungle is full of _ _ _ _ _ _ _ _. The forest is full of _ _ _ _.
