Test- March VIII[6]

name: ..... ***№*** ..... ***date:*** .....

1. READING 2. Read the text about elephants and write T (true) or F (false). _____ **/ 5 p.**

Elephants are giant, intelligent animals. There are two types – Indian and African elephants. They have different ears, head shape, and body size. They are very social – they live in big family groups in which the leader is always an old mother. Elephants eat fruits and plants – they usually eat about 200 kilograms every day. Elephants live about 60 years when they are in the wild and only about 20 years in the zoo. People kill them for their skin and tusks (their long front teeth). But their most interesting body part is their long nose. It's called a trunk and it is about 2.5 m long. Elephants use it to smell, drink, eat, and communicate. It also helps them breathe in deep water and lift heavy things.

0. Elephants are clever animals. T
1. Indian and African elephants have different ears. _____
