## Discursive Writing Example

*Is AI beneficial or harmful to humans?*

*I strongly believe that artificial intelligence is generally beneficial to humans. To begin with, AI helps people complete tasks more efficiently by reducing wasted time. This clearly shows that AI can improve everyday life in a practical way.*

*Another important benefit of AI can be seen in education. For example, students may use AI to check grammar or organise ideas more clearly. This demonstrates that AI can support learning when sensible rules are in place.*

*In addition, AI plays a valuable role in healthcare. Notably, doctors use AI systems to identify illnesses at an earlier stage. This proves that AI can contribute to saving lives.*

*However, AI must be carefully controlled. If it is used responsibly, the advantages outweigh the risks. Therefore, AI is more beneficial than harmful when clear limits exist.*

**Questions**

1. What is the writer's main argument?
   A. AI should be banned because it is dangerous
   B. AI is only useful in education
   C. AI is generally beneficial to humans
