Write the correct form of the given word.

20.We were amazed at the _____ of robots at the exhibition.

(PERFORM)

PART 4 ERROR RECOGNITION (2 questions)

Find the underlined part that needs correction in the following question.

Question:

21. The new tablet is modern, and the screen is a little too small.

A. new B. is C. and D. a little too

Find the underlined part that needs correction in the following question.

Question:

22. The gravity on the moon is different of that on Earth.

LIVEWORKSHEETS

A. on B. is C. of D. that

PART 5 READING (5 questions)

Read an article in a school magazine from a young inventor, Jess, and choose the best answer for each question. (5 questions)

My mother is a computer programmer and my father is a computer engineer. He loves repairing computers in the garage. My sister and I enjoyed helping him from an early age, always seeing who could be more helpful. He wasn't an inventor, but he showed us inventions all the time which made computers work better. I learned then that technology must help people do something better.

When I was 10, I had an idea for a robot which could make tea in the morning and then wake you up. But my mother said people already had that kind of machine. I realized then that an inventor has to find answers to new problems.

When I was 12, I built a robot for a competition. It could climb stairs. I won first prize in my age group. The judges said that I had solved a problem which took robot engineers years to solve. Climbing is easy for humans, but it is hard for robots.

I'm working on a robot now which can do lots of different things. Robots which can do one thing very well are everywhere, in car factories, for example. We don't really think of them as robots, because they can't navigate around a room or talk to us. But each one only has one job. It is expensive to build robots **like this**, because each one contains hundreds of parts which are the same. It costs less if each robot can do many things, like a human being.

Questions:

23. The writer probably started inventing things because _____.

A. her parents both work with new technology B. her father invented things for computing C. she saw her father solving problems D. she wanted to do better than her sister

24. What does the writer feel now about her first robot?

A. It didn't solve a new problem. B. It wasn't a very good idea. C. It wouldn't really work. D. Robots can't make tea.

25. Why did the writer's robot win a prize when she was 12?

A. Because she was the first person to make a robot that could climb stairs B. Because she had solved a difficult problem C. Because her robot could make tea D. Because there was a category for her age

26. What does **like this** mean in the final paragraph?

A. In a good way B. With only one job C. Which can navigate around a room D. Which can talk

27. Why is it better to have robots which can do many things, according to the writer?

A. They are cheaper. B. They are like humans. C. They can work better in car factories. D. They can walk around and talk.

PART 6 LISTENING (5 questions)

LIVEWORKSHEETS

Listen to a conversation between two friends. Choose the best for each question. (5 questions)

Questions:

28. The girl wants a new laptop _____.

A. to watch movies B. to play video games C. to talk to friends and family D. to go on the web for school projects
