Smart City Event: Volunteer Application

Last name: Acosta **First name:** Joe **Position:** Event Assistant

Personal Statement

I am very interested in working as an Event Assistant in this year's Smart City Event. I studied political science and economics in college, and I am very interested in how we can make our cities better. I visited the Smart City Event last year. There were some fascinating speakers, the topics were interesting, and I met some very nice people.

I have never been an assistant for an event like this, but I did organize our graduation party in college. I had to start early and work with eight other people. The party was a success, and I think my organizational skills helped. I am good at working with people, and I can work well on my own or as part of a team.

In addition, I completed a project in college on the use of technology in cities, so I know quite a bit about smart cities. In the future, I would like to work for the local government.

I believe I would be successful as an Event Assistant because I have lived here all my life, and I know the city well. I could help people if they have questions about the city. I am a sociable person and enjoy being helpful. I speak English, Spanish, and some French. This could be an advantage if some visitors don't speak English.

I am available to work the weekend of September 5 and 6, and I can start as early in the day as you like.

I am available for an interview. Please contact me if you have any questions.
