1. READING COMPREHENSION

A surprise passenger, British taxi driver Daniel Harris, became a midwife for an hour when a passenger gave birth to a baby in the back of his taxi.

Sara Mitchell's baby was due in a month, but when her contractions started, she called a taxi to take her to the hospital. Mr Harris answered the call. The expectant mother was in the taxi for only ten minutes when she realised that things were happening too fast.

The baby was not going to wait. Its head appeared, and Mr Harris stopped the taxi to help with the birth.

Mr Harris said, "I was there when my children were born, so this was not completely new for me. I spoke to a nurse on the taxi radio, and she gave me instructions. I only did what she told me."

A midwife at the hospital explained that if a baby is born on the way to the hospital, people should support the baby's head and guide it out carefully. They should not pull the baby.

Later, the mother said, "Daniel was wonderful. He did everything right." Mother and baby were both doing well.

A. Answer YES or NO.

1. Was the baby due in two months? _____
2. Did Sara call a taxi to go to the hospital? _____
3. Did the baby arrive before they reached the hospital? _____
4. Did Mr Harris receive instructions from a nurse? _____
