MEL3 Worksheet 1 Hourly Wages Name:

1. Dean stocks shelves at the grocery store and earns $14.20/hour. He worked 32 hours this week. Calculate his weekly pay.

14.20 X 32 = $

2. Yves works as a forklift operator and he is paid $14.20/hr. He worked 48 hours this week. Assuming 1.5 overtime rate, calculate his weekly earnings.

Calculate overtime rate:

14.20 X 1.5 = $

Overtime worked: Overtime pay:

48 – 44 = 4 X =

Regular pay:

14.20 X 44 = $

Total pay:

Regular pay Overtime pay

+ =
