Algebra Practice
Solving Equations 1

Solve each equation by stating what x is equal to. You may want to write out your work on a separate piece of paper to do all

$x + 4 = -8$	x =
$4x = -12$	x =
$2x + 2 = -6$	x =
$3x - 1 = -10$	x =
$-2x = 8$	x =
$5x + 9 = -1$	x =
$2x + 4 = 12$	x =
$5x – 9 = 6$	x =
$-x + 9 = 12$	x =
$4x - 2 = -10$	x =
$6 + 3x = 9$	x =
