MEASUREMENTS

HOMEWORK
5/10/2021

1. A restaurant has 5 gallons of soup. If 8 pints = 1 gallon, what is the total number of pints of soup the restaurant can serve?

a. 24 pints	b. 40 pints
c. 48 pints	d. 60 pints

2 & 3. Determine the equivalent measurement for each problem using the given equivalents:

16 ounces	**=**	**1 pound**
1,000 grams	**=**	**1 kilogram**

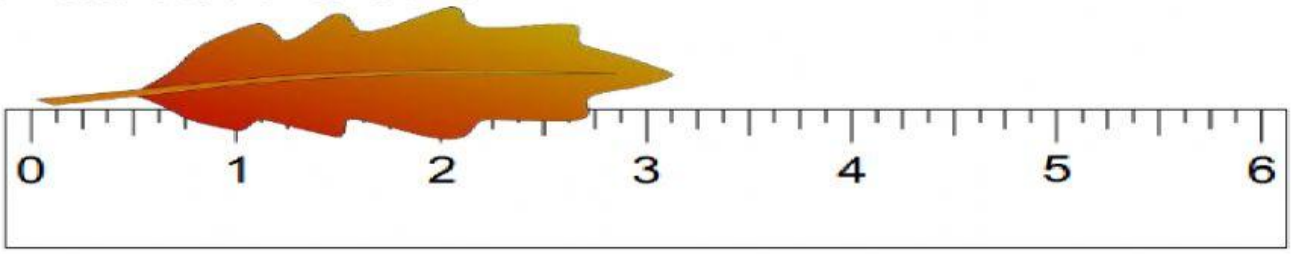
2. 64 ounces = _____ Pounds

3. 7,000 grams = _____ Kilograms

4. Sarah is preparing her material to make a blanket. She has determined she wants her blanket to be at least 6 feet long. If 1 foot = 12 inches and 3 feet = 1 yard, what are the equivalent measures she needs for her blanket?

- 36 inches
- 72 inches
- 2 yards
- 18 yards

5. Measure to the nearest inch.



a. 3 ½ inches	**b. 3 ¼ inches**	**c. 3 ¾ inches**	**d. 3 ⅛ inches**
