TOPIK: PENOLAKAN PECAHAN

Lihat video penerangan supaya lebih jelas.

Latihan:

1) $\frac{7}{10} - \frac{4}{10} = \frac{\quad}{\quad}$

2) $2\frac{2}{7} - 1\frac{1}{7} = \frac{\quad}{\quad}$

3) $\frac{3}{4} - \frac{2}{5} = \frac{\times}{\times} - \frac{\times}{\times}$

$= \frac{\quad - \quad}{\quad}$

$= \frac{\quad}{\quad}$

4) $4\frac{2}{5} - 2\frac{1}{3} = \frac{\quad}{\quad} - \frac{\quad}{\quad}$

$= \frac{\times}{\times} - \frac{\times}{\times}$

$= \frac{\quad - \quad}{\quad}$

$= \frac{\quad}{\quad} = \frac{\quad}{\quad}$

5) $6\frac{3}{5} - 4 - \frac{1}{4} = \frac{\quad}{\quad} - \frac{\quad}{\quad} - \frac{\quad}{\quad}$

$= \frac{\times}{\times} - \frac{\times}{\times} - \frac{\times}{\times}$

$= \frac{\quad - \quad - \quad}{\quad}$

$= \frac{\quad}{\quad} = \frac{\quad}{\quad}$

6) $6\frac{1}{2} - 2\frac{3}{4} - \frac{5}{8} = \frac{\quad}{\quad} - \frac{\quad}{\quad} - \frac{\quad}{\quad}$

$= \frac{\times}{\times} + \frac{\times}{\times} + \frac{\times 1}{\times 1}$

$= \frac{\quad - \quad - \quad}{\quad}$

$= \frac{\quad}{\quad} = \frac{\quad}{\quad}$
