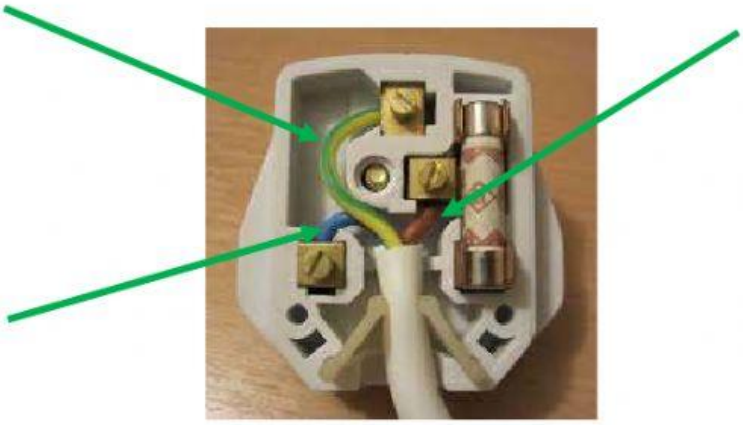
Wiring a Plug

The diagram below shows the wiring in a 3-pin plug.



Choose the name for each wire below then drag it to the correct position.

Neutral wire Live Wire Earth wire

Match the element with its characteristic:

Element	**Characteristic**
Earth ●	●Carries electric current to the device.
Neutral ●	●breaks the circuit if a fault causes too much current flow.
Live ●	●Safe route for current to flow through.
Fuse●	●Carries electrical current back to power source.
